

APEX-EYE

KM-9000 (Electronic Apex Locator)

WET

DRY

BLEEDING

Electronic Apex Locator is one of the medical devices locating (dental root fistula of cementum) during tooth operation, which in correctness than X-ray by medical industry.

neural crest is currently recognized better

■ Features

- State-of-the-art-technology with a thoughtful consideration on engineer
- A correct measurement is possible under any root canal environment
- Convenient treatment with the use of LED and SOUND
- Pursuit of portable convenience by minimizing and being light weight
- Improvement of correctness in measurement (dual scale)
- It can check the length of file by a built-in File magnifier
- Excellence in environment testing(temperature and moisture) and durability
- Extension on battery life by the consumption on low electricity
- Function on protection from the inside shock through an earthquake-resistant design
- Hand carry by the use of portable clip
- Reinforcement of a customized handpiece treatment function, which is light and compact
- Weight: approximately 100g
