Lighting on your hand

Helio is a portable lighting system. Dental mirror shape is most familiar and convenient to make lighting anywhere in oral cavity. Cordless, Autocalveable, and many variety functions for users make its value up.

Features of Helio

Lighting anywhere

Make light anywhere in oral cavity. Mirror shape is most familiar and easy to use for any kinds of dental practices.

Sterilization

Cold & hot sterilization is available.

Easy to change Mirror

The mirror interchangeable easily with the magnetic inside of device.

Cordless

Without wire makes its convenient up.

Practical design

The device can be used like dental mirror. The device is designed possible to keep sterilized condition for surgical operation.

Big capacity battery

Useable the battery more than 2 hours after full charge.

Smart system

There is no switch. Turn on with grip it, and turn off with put it. To change intensity, shake the device vertically. To save battery, the device turn off automatically when don't use it.

Most Economic, Most Practical Lighting System

There is no switch to turn on/off and change the intensity. Smart system makes you enjoy using it. Don't need expensive astral lamp, inconvenient head lamp, fiber optic system, or other intraoral lighting system.
